ASSEMBLY AND OPERATION

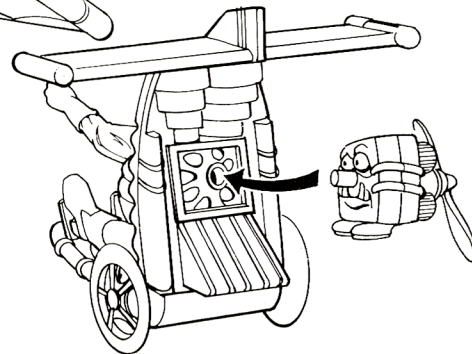

1. Bend legs and arms on figure to position him in seat.

2. Attach seat belt by inserting pointed end into slot and holding to desired tightness by catching it in side of slot.

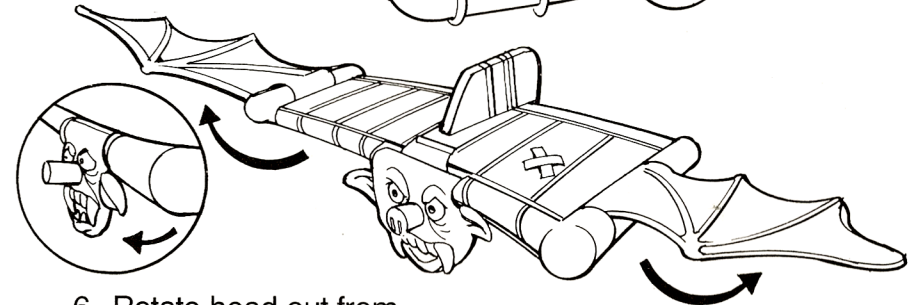

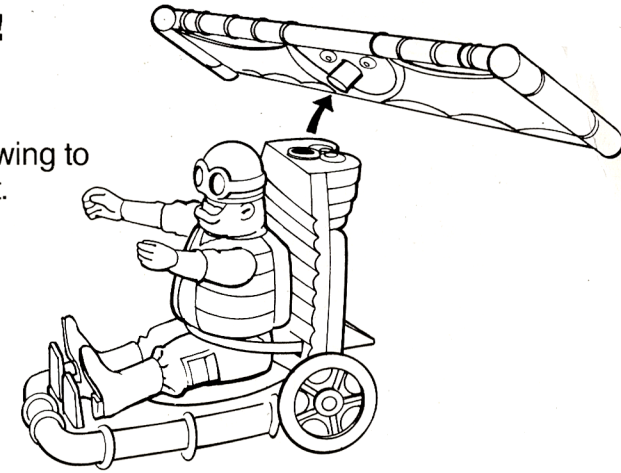

3. Insert peg on glider wing into hole on top of seat back.

4. Insert nose peg, on opposite side of motor/propeller assembly, into hole in back of seat. Spin propeller manually.

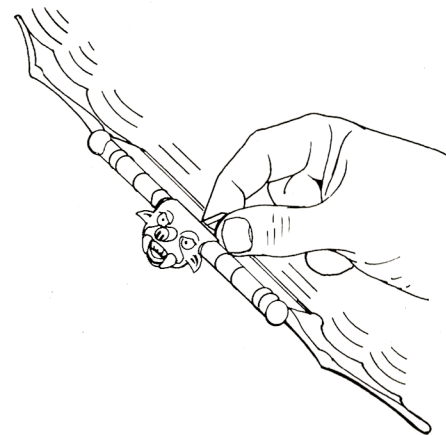

THE CHANGE!

5. Pull up on glider wing to remove from seat.

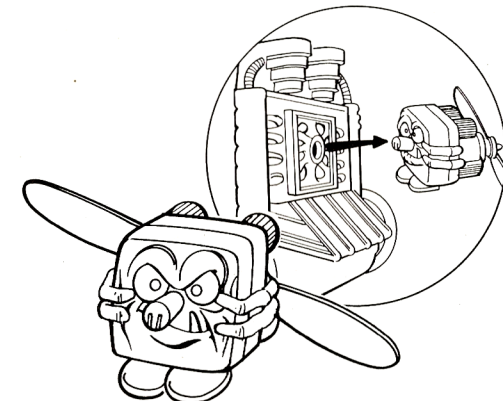

6. Rotate head out from underside of wing.

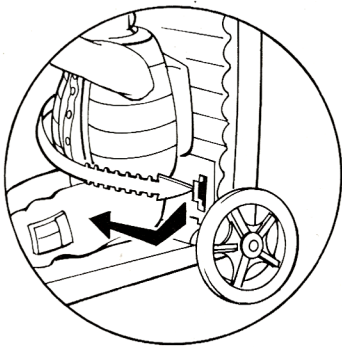

7. Rotate each ghost wing extension out from underside of glider wing to second snap.

8. Ghost can be held for pretend flying.

9. Pull propeller/motor assembly out from back of seat to reveal motor ghost.

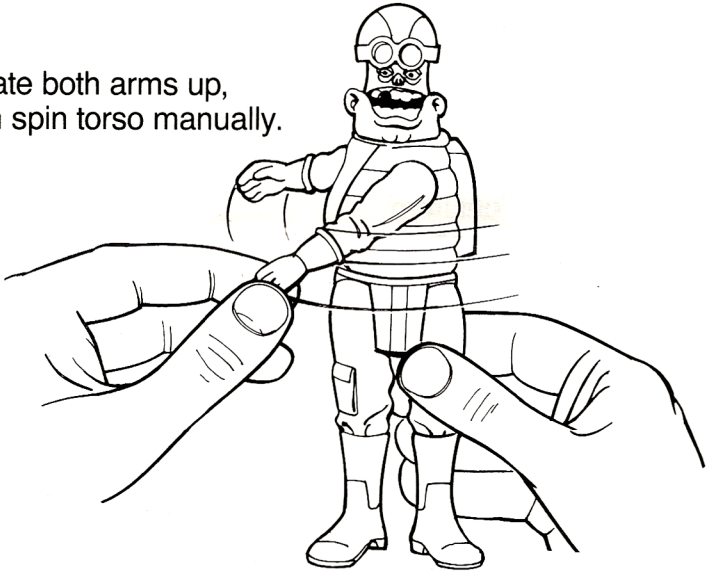

10. Pull seat belt over and out to remove seated figure.

11. Pull up on helmet to extend head to open position.

12. Rotate both arms up, then spin torso manually.

13. Position seat belt between foot rests to resemble a tongue.
14. Push down on seat back to convert vehicle to ghost. All ghosts can be converted back into a pretend flying vehicle with driver.
